PROJECT EXPERIENCE

Personal work

Jos,Nigeria

Personal projects

Nov 2021 - Feb 2022

- Built my personal portfolio website, using Html, Css, Bootstrap and React. I also used Node.js and Express.js to create an email system using nodemailer dependency.
- I built a prototype shopping app that made use of firebase and it's database using the CRUD methods to update create new products, read, edit and delete new product entries.

Yalzapp

Portharcourt,Nigeria

Who is lying website

Jan 2023 - Feb 2023

- I created a mobile game website using React.js. I worked on the project with other team members utilizing the different materials shared between team members, like the UI/UX design and animations.
- I hosted the website using firebase, hosting service, and used Namecheap to get a custom domain name for the website.

LEADERSHIP EXPERIENCE

Devspee analytics

Jos,Nigeria

Operations and Project Manager

Jul 2022 - Sep 2022

- Facilitated and supervised the development of a newly launched website analytics dashboard which aggregates

user details, resulting in an 80% streamlined data collection process.

- Directed and allocated resources to three-member team to build custom database for website, allowing easy access to user details and providing a high level of accuracy in data presentation.
